

E.D. Soulis Memorial Weather Station Summary – May 2025

A very average month of May

A warmer first half of the month was offset by a cooler second half, leading to an overall temperature that was right on the average for the month. The temperature last went below zero on May 9, which is close to the average date in the history of the Soulis memorial weather station.

There were a couple of wet days during the month, but nothing out of the ordinary. The final total was 88.2 mm, the wettest for May since 2019, but still within the average range. So far the total for the year is 379.2 mm, which is close to the average of 340.2 mm.

Summary for May 2025:

Maximum Temperature 28.0°C

Minimum Temperature -0.9°C

Average Daily High Temperature 18.9°C (Long term average 19.1°C)

Average Daily Low Temperature 7.5°C (Long term average 7.3°C)

Total Precipitation 88.2 mm (Long term average 73.8 mm)

(Long term averages based on 1998-2024 data from the Soulis Memorial Weather Station at the University of Waterloo)
